Allowable Subject Matter

Claims 1-32 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. 5,963,709. The improvement comprises the addition of a tungsten containing material in the thermo-electric environment of the device. The hot air device of US Patent 5,963,709 was modified to contain a tungsten compound in the thermo-electric environment and inserted into the hot air stream in the device at the hottest point (base). After a while the hot air began to glow in a manner that indicated plasma formation. The insertion of the tungsten compound caused plasma formation and also increased the measured gas temperature. In the examiner's opinion, it would not have been obvious to a person of ordinary skill in the art to place a tungsten containing material in the 5963709 device to promote plasma generation since the 5963709 device previously did not function as a plasma device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 703-306-9042. The examiner can normally be reached on Tue-Fri 5:30AM-4:00PM.
